# Tetra<sup>®</sup> miniMAX

LED Lighting System

Wet or dry—our **brightest** solution  
for **small** channel letters

imagination at work

# Tetra® miniMAX

## Maximized Output. Minimized Expense.

**Tetra® miniMAX**—the remarkable LED system designed for small channel letters as shallow as 1.5 inches in depth delivers incredibly uniform light, installs easily and operates efficiently. The **Tetra® miniMAX** is now IP66 and UL wet rated which makes it more robust and reliable even under wet weather.

Working closely with sign builders and owners, we've refined our design to improve performance while decreasing the amount of product required, further reducing installation and material costs.

### Powerful OptiLens™

**Tetra® miniMAX** features **OptiLens™** a patented technology that captures otherwise wasted light and redirects it towards the illuminated surface with impressive uniformity. It optimizes each LED—which enables wider stroke spacing—reducing the amount of material needed per sign while helping protect the LED against moisture, humidity, damage and corrosion.

### Tetra® miniMAX Wet Location Rated

Now there's a miniMAX solution for **wet locations** where saturation with water or other liquids is likely. Integrating all the same performance features of miniMAX, the miniMax wet rated is IP66 and UL wet rated. It contains an added over molded design that protects against water ingress, dust and damage, and a special module top surface to eliminate water retention —no separate enclosure is required.

a product of  
**ecomagination™**

## Can cut product required almost in half

Many LED systems use about 13 LED modules in 2 rows to fill a capitol "T" channel letter that's 2 feet high.

***Use one row, not two.*** Tetra® miniMAX stretches stroke spacing to an impressive 7 inches in a 3-inch depth channel while maintaining impressive light uniformity on the sign face. It protects your customers' brand image while reducing product costs and saving you installation time.

## Total GE Reliability

To ensure every Tetra® miniMAX installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. Rather than relying solely on test data from LED suppliers, we test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high-temperature, high-humidity and accelerated life testing.

## Components

SKU	Description	Package Quantity
GEMM71-W1	Tetra miniMAX 7100K	100 ft (30.48 m)/box (250 modules)
GEMM50-W1	Tetra miniMAX 5000K	100 ft (30.48 m)/box (250 modules)
GEMM41-W1	Tetra miniMAX 4100K	100 ft (30.48 m)/box (250 modules)
GEMM32-W1	Tetra miniMAX 3200K	100 ft (30.48 m)/box (250 modules)
GEMMRD-W1	Tetra miniMAX Red	100 ft (30.48 m)/box (250 modules)
GEMMBL-W1	Tetra miniMAX Blue	100 ft (30.48 m)/box (250 modules)
GEMMGL-W1	Tetra miniMAX Green	100 ft (30.48 m)/box (250 modules)
GEMMPO-W1	Tetra miniMAX Orange	100 ft (30.48 m)/box (250 modules)
9409	18 AWG Supply Wire (0.82 mm <sup>2</sup> )	500 ft /spool (152.4 m)
191600041	22-14 AWG Twist-On Wire Connectors (0.33 - 2.08 mm <sup>2</sup> )	500/ PK
192160004	18-14 AWG In-line Connectors (IDC) (0.82-2.08 mm <sup>2</sup> )	500/ PK

## Technical Specifications

Color	Wavelength	Typical Brightness (lumens/module)	Typical Brightness (lumens/ft.)	Energy Consumption (Strip/Module)	Energy Consumption (System/Module)	Power Supply Loading	Viewing Angle
